## **Abstract**

Starting from Sura 4, Annisa, and alternating by adding 5 then 7 suras we get a sequence of 19 suras that have a total of sura numbers equal to the total of aya numbers with sura 57 (the middle sura of the Quran) being the middle of the list. The two totals, 1093, as well as 5, 7 and 19 are all prime numbers.

## **Introduction**

It was shown before that sura 57, Alhadeed, plays a pivotal role in some numerical analysis of the Quran [1]. We felt that using 5 and 7 (the two constituents of 57) as alternating steps in an arithmetic series while maintaining 57 as the middle of the list we will get something interesting. We did.

## **Amazing 19 Suras**

As we can see in table 1, we started from sura 4, Annisa, and added 5 to get sura 9 and then added 7 to get sura 16 and so on. The total of the sura numbers is 1093 which is the same as the total of the number of ayas in the 19 suras. Interestingly, 5, 7, 19, and 1093 are all prime

numbers. The two digits 5 and 7 when concatenated make the number 57 which itself is  $3 \times 19$ .

Step	Verses	Chapter	Number
	176	4	1
5	129	9	2
7	128	16	3
5	112	21	4
7	88	28	5
5	73	33	6
7	85	40	7
5	37	45	8
7	49	52	9
5	29	57	10
7	18	64	11
5	52	69	12
7	31	76	13
5	29	81	14
7	26	88	15
5	11	93	16
7	11	100	17
5	5	105	18
7	4	112	19
	1093	1093	

Table 1 – Table of 19 suras starting from sura 4 with alternating steps of 5 and 7 showing the total of the sura numbers as well as the total of the number of ayas in the suras.

Note that sura Alhadeed, 57, is the middle of the table.

It was noted that the 19 Suras started with number 4 and ended with a sura that has 4 verses. The first sura as well has 176 ayas,  $176=11\times 4\times 4$ . That last sura's order is  $112=7\times 4\times 4$ . The difference between the divisions of those two numbers over  $4\times 4$  is  $(7-11=4)$ . Finally, it was noticed that the Sura number 4 in the table has 112 ayas.

### **Conclusion**

This is further proof that sura Alhadeed plays a pivotal role in some system of numerical analysis of the Quran. The number 19 also is showing one more of its properties in the Quran.
